Core-AMA Management House, ATIRA Campus, Ahmedabad 15

---

Welcome. This course is designed for anyone concerned with the best way to explore creativity through lens & microphones, through sound & Visuals, through light & moving pixels. It's for all interested.

Filmmaking involves a number of discrete stages including an initial story, idea through research and script writing, casting, shooting, editing, mixing and screening the finished product before an audience. Filmmaking takes place using a variety of cinematic techniques. Since the introduction of digital technology, the means of production have become more democratized. Over the last few years this field has witnessed quite a few remarkable changes. Filmmakers can conceivably shoot and edit a film, create and edit the sound and music, and mix the final cut on a home computer. The Internet has allowed for relatively inexpensive distribution of independent films on social media and You Tube. An amateur armed with a smart phone can capture a live session, edit the same & even broadcast it. All that one need to make a film is an idea & zeal to visualize it.

Travel films are always popular. They provide an insight of the place like history, architecture, geography, people, nature etc. and motivate us to visit the places. For filmmakers, they provide information about the locations for shooting. Learning film making with focus on tourism, you can be next line producer, and contribute to Cinema Tourism in Gujarat.

#### **Course content:**

1. Basic understanding of the visual grammar
2. Tourism and films – experience sharing
3. Pre-Production- Research, Scripting, Treatment, Planning, Budget
4. Production – Camera, Lighting, Sound, Direction
