

For improved Team & Individual Performance
Saturday, February 23, 2019 - 5.00 to 8.00 p.m.

Introduction

- When we are confused, we cannot act and precious time is wasted.
- What is the root cause of confusion? It is lack of discipline in thinking.
- Our mind is capable of six distinct types of thinking. If we are aware of these types of thinking and deploy them in the right sequence, confusion vanishes and clarity is self-evident. We become better and more effective professional.
- When we are in a meeting, considerable time is wasted in non-productive debates, arguments, reiterating the same points, proving others wrong and projecting oneself as a paragon of virtues.
- All the people present can prevent this colossal waste of time, by deciding to adopt parallel thinking with six thinking hats in succession.

Themes and Exercises

- Causes of confusion - the discipline required for bringing clarity
- Edward De Bono's theory on 'Parallel thinking with Six Thinking Hats'
- Exercise 1: How we think at present?
