The Micro, Small and Medium Enterprises (MSMEs) of India have been experiencing several highs & lows in the past few years. India is home to nearly 70 million MSMEs, majority of which are in low-tech areas and serve local domestic markets. In India, The MSMEs sector constitute single largest employer after Agriculture Sector. Given their contribution in GDP growth and higher level of employment; sustainability and proper nurturing of MSME Sector is imperative.

What are the indicators to ensure sustainable development of Indian MSME Sector? What will be the implications of the new Industrial Policy on the MSME Sector? What will be the role of financial institutions, technology and quality control in facilitating sustainability of MSMEs?

In response to the above questions, **Ahmedabad Management Association (AMA)** in collaboration with **Entrepreneurship Development Institute of India (EDII)** organize this MSME Conclave 2018 under **YES Bank's** CSR project "Say YES to Sustainable MSMEs in India".
