

## Programmes on Teachers

**Preamble:** The rapidly evolving digital landscape demands that educators approach teaching and learning very differently in the 21<sup>st</sup> century. Learning must be relevant to the needs of the students and equip them for the emerging global economy. Today's teachers have to develop a new mindset and acquire a new set of professional skills in tune with the times. They need to be aware of the changes in contemporary educational domain and get ready for a makeover. *They have to unearth the inherent potential of their students and unleash their creativity. There must be a better understanding of the learner's perception, choice and capabilities and a focus on how they learn, what they experience and how they engage with their learning.*
